### REACH - Declaration of Conformity 1907/2006/EC extension – 27.06.2024

Under Article 33 (1) of the European Union concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Regulation 1907/2006 / EC, our plants and their suppliers are obliged to inform us of certain substances contained in the products manufactured or imported in the Member States.

The European Chemicals Agency (ECHA) does revise and publish the Candidate List of SVHC continuously. Following the current list our factories are complying with their obligations and are performing the appropriate identification processes. In this context, we confirm that none of the substances listed in the candidate list is present in a concentration of more than by mass in our products.

As mentioned above, our plants and partners are obliged, to align the products and product base materials according to the requirements of REACH - regulation regularly with the materials specified in the list of candidates. The current status of the Candidate List can be verified under the following link: <https://echa.europa.eu/de/candidate-list-table>. Once they find that their products and product base materials are subject to notification, we will be voluntarily informed. Of course, we are implementing this duty and we do inform you and our customers in general immediately and according to regulations. A safety data sheet for products that require REACH regulation is available unsolicited.

Do not hesitate to call us if you have additional questions. We are always at your disposal for supplementary information.

Best regards,

Desca AG
